Customizable Invoices

Dancik is introducing new functionality that allows for customizable invoices.

This functionality does not pertain to the actual printing of your invoices. It relates to the distribution of PDF invoices via Output Distribution System (ODS).

If you would like to talk to Dancik about customizing your invoices, contact our Client Support Services at 919-379-3740. or at client_services@dancik.com.

Invoice formats are assigned by:

• Accessing menu option ODS 10 - Settings and Layout Overrides.

• Enter a "2" to change the format for Invoices.

```
 5/09/12                     Output Distribution            ODSSETOVRR
 8:23:51            Settings and Overrides File Maintenance   DD

                                                              Uses
Opt  Id          Description                                Stylesheet
 _   ARSTATCL    Print Monthly A/R Statements
 2 * INVOICES    Printing of Invoices                          N
 _   OPENP1CCL   Open Order Reports for Customers
```

Figure 3-21: *Changing the Invoice Format*

• Enter a "Y" to use the default Dancik Invoice stylesheet format.

```
 5/09/12                     Output Distribution            OD39991R
 8:36:22                     Additional Options               DD
Program ..........: Printing of Invoices

Use stylesheets to construct PDF ................................: Y (Y/N)
```

Figure 3-22: *Activating Invoice Stylesheets*

Three invoices examples are shown on the following pages.

• The first example is the Dancik default invoice generated *without* using stylesheets.

• The second example is the default Dancik stylesheet based invoice format.

• The last example is of a customized invoice.

Default Invoice Format (Stylesheet is NOT used)

Customizing Invoices

Using Stylesheets to customize Invoices

Old vs New

- **OLD WAY**
  - Very limited in flexibility.
  - All boxes, labels, headings and values are all static in position.
  - Only allowed for heading overrides, alignments and a global font size override.
  - Follows the 'printed' versions page and detail lines control

Using Stylesheets to customize Invoices

Old vs New

- **NEW WAY**
  - Very flexible and dynamic.
  - Utilizes combination of data (XML) and stylesheets (XSL-FO).
  - Everything can be adjusted.
  - Produces the Invoices free from limitations of the 'printed' version.

Using Stylesheets to customize Invoices

How it works

- Submit to Print Invoices using ODS.

  - Assuming you have properly setup INVOICES to use stylesheets. (See ODS 10)

- Build XML (data) file of Invoice Information

- Combines the XML file with the pre-built XSL-FO files to produce your PDF file.
Using Stylesheets to customize Invoices

How it works

- Worksfiles are populated to generate XML (data) files

- XSL-FO can be edited using WYSIWYG tools or simple notepad editors.
  - XSL stands for Extensible Stylesheet Language
  - FO stands for Formatting Objects.

- Apache FOP is used to combine the XML and XSL together to make the PDF.
  - FOP stands for Formatted Objects Processor

Using Stylesheets to customize Invoices

XML Layout

- A single XML file is built during the construction process.
  - It will contain all information that would/could be produced during the Invoice print process.
- The main parent to the XML file is <invoices>.
  - The next child elements will be <invoice>.
- File can contain information for multiple invoices, pending on how the Invoice print request was run.
- A invoice element will contain two child elements.
  - Header
  - Details

Invoice XML Detail Element definitions

line		Line#
item		Item#
item_description		First Item Description
serial		Serial#
uom		Unit of Measure
qty_ordered		Quantity Ordered
qty_shipped		Quantity Shipped, if any
qty_backordered		Quantity Backordered, if any
price		Unit Price
extended_price		Extended Price
print_for_msg		Flag to indicate to print message(s)
message		Message
message_price		Price, on message line
print_for_det2		Flag to indicate to print second detail line.
det2_cell1		If there is a customer Item#, load it.
det2_cell2		Internal Shade, (conditional)
det2_cell3		2nd Item Description
det2_cell4		Quantity ordered, in the customer's UOM
det2_cell5		Conditional Field
det2_cell6		Conditional Field
det2_cell7		The customer's UOM
det2_cell8		Conditional Field
det2_cell9		Conditional Field
print_for_detu		Flag to indicate to print customer u/m conversion line.
detu_cell1		Quantity ordered, in the customer's UOM
detu_cell2		Quantity shipped, in the customer's UOM
detu_cell3		Quantity backordered, in the customer's UOM
detu_cell4		The customer's UOM
detu_cell5		Unit price in, the customer's UOM
print_for_det3		Flag to indicate to print third detail line.
det3_cell1		Credit Message : (Credit/(No) Return To Stock)
print_for_det4		Flag to indicate to print fourth detail line, containing Fund Descriptions.
det4_cell1		Promo Program# - (Pgm# XXXXXX)
det4_cell2		Marketing Program # - (Fund XXXXXX)
det4_cell3		Overridden fund title
print_for_slmn		Flag to indicate to print salesman line.
slmn_cell1		Salesperson's name
print_for_feet		Flag to indicate to print feet and inches conversion line.
feet_cell1		Internal Shade (conditional)
feet_cell2		Feet / Inch conversion
feet_cell3		Price Restriction (C/R)

Invoice XML Detail Element definitions

print_for_pc		Flag to indicate to print slab size information
pc_cell1		(Pieces) PC (Length) x (Width)
print_for_um		Flag to indicate to print unit of measure conversions.
um_cell1		First Factor conversion - ((factor) FromUOM / TOUOM)
um_cell2		Second Factor conversion - ((factor) FromUOM / TOUOM)
print_for_poin		Flag to indicate to print promotional points.
poin_cell1		Extended # of points message - (* (points) Promotional Points *)
print_for_err		Flag to indicate to print any errors that may have occurred for line item.
err_cell1		<< INVALID ITEM >>
err_cell1		<< COUNT NOT CONVERT QTY TO REQUESTED U/M >>
print_for_bo		Flag to indicate to print backorder message.
bo_cell1		Backorder message = ...THIS IS A BACK ORDER....
print_for_tax		If only taxing "A" items and this is an "A" item, flag to indicate this is a taxable item.
tax_cell1		Taxable Item Message = ****** TAXABLE ITEM ******
print_for_subs		Flag to indicate to print sub-serial#s
sub_serial		Serial#
print_for_mfrm		Flag to indicate to print if item is a manufactured item using components.
mfrm_cell1		Message : Item above was manufactured using the components shown below:
print_for_mfrc		Flag to indicate to print manufacturing components
mfrc_cell1		Mfgr Components
mfrc_cell2		Mfgr Component's Item Description 1
print_for_mfr2		Flag to indicate to print manufacturing components' second item description
mfr2_cell1		Mfgr Component's Item Description 2
print_for_pis		Flag to indicate to print special instructions
special_instruction		Special Instruction
toggle_line		Indicates to toggle background color, if desired, because of a new line
