# Navigator Set-up

## Password

Navigator uses the same password as the AS400 (green screen). Password maintenance for Navigator is done in the green screen via the WRKUSRPRF command and associated system values.
» The **QPWDEXPITV** variable determines the password expiration interval.
» The **QPWDEXPWRN** variable determines the password expiration warning.

You can use **WRKSYSVAL** to set these system variables

```
                        Work with System Values
                                              System:    SAL
Position to  . . . . .    _____    Starting characters of system value
Subset by Type . . . . .   *ALL___      F4 for list

Type options, press Enter.
  2=Change    5=Display

          System
Option    Value        Type      Description
          QPWDCHGBLK   *SEC      Block password change
  _       QPWDEXPITV   *SEC      Password expiration interval
  _       QPWDEXPWRN   *SEC      Password expiration warning
  _       QPWDLMTAJC   *SEC      Limit adjacent digits in password
  _       QPWDLMTCHR   *SEC      Limit characters in password
  _       QPWDLMTREP   *SEC      Limit repeating characters in password
  _       QPWDLVL      *SEC      Password level
  _       QPWDMAXLEN   *SEC      Maximum password length
                                                              More...
Command
===> _____
F3=Exit    F4=Prompt    F5=Refresh    F9=Retrieve    F11=Display names only
F12=Cancel
```

**When logging into Navigator:**

» If a user's password is expired, they are unable to change their password or login to Nav. Their password will need to be reset via the GS either by an administrator, or by logging into the GS.

> If the password expires, it has to be reset via the green screen.

» The Expiring Password prompt will appear based on the QPWDEXPWRN system value. The prompt will show the number of days remaining until the users' password expires, and the opportunity to change reset their password.

» If the QPWDEXPWRN value isn't set, users will not be provided with the expiring password prompt and will not be able to reset their passwords.

*It is Dancik recommendation to set your QPWDEXPWRN value to at least 14 days.*

» If the Expiring password prompt is displayed and the number of days before expiration is 7 or less, users will not be given the option to "Continue to Navigator". They will be required to reset their password at that time.

## Expiring Password

**Your password will expire in 14 days.**
You can change it now or continue to Navigator. You will have to log back in after changing your password.
