

Dancik Open-WebService Reference

Function ID/Path : /d24/getPaymentProfile

This function retrieves Payment Profile settings, from User/Global.

Inputs :

Variable	Type	Req?	Description
d24user	string(10)	Y	The login profile name. When this field is not populated, only global settings and values will be returned.
d24sesid	string(20)	Y	The logged in users active session id.

Example (XML) :

```
<dancik-api-request>
  <d24user> XXX </d24user>
  <d24sesid> XXX </d24sesid>
</dancik-api-request>
```

Example (JSON) :

```
{
  "d24user": " XXX ",
  "d24sesid": " XXX "
}
```

Outputs :

Layout name : config

Variable	Type	Description
billto_address1	string	Bill To Address 1.
billto_address2	string	Bill To Address 2.
billto_city	string	Bill To City.
billto_country	string	Bill To Country.
billto_name	Numeric	Bill To Name.
billto_state	string	Bill To State.
billto_zip1	string	Bill To Zip Code 1.
billto_zip2	string	Bill To Zip Code 2.
buttonName_cancel	string	Cancel Button Text.
buttonName_clear_selections	string	Clear Selections Button Text.
buttonName_pay_invoices	string	Pay Invoices Button Text.
buttonName_payment_details	string	Payment Details Button Text.
buttonname_print_payment_request	string	Print Confirmation Button Text.
buttonname_print_remittance_advice	string	Print Remittance Advice Button Text.
buttonname_return_to_open_invoices	string	Return to Open Invoices Button Text.
buttonname_return_to_transaction_history	string	Return To Transaction History Button Text.
buttonName_select_all_due_now	string	Select All Due Now Button Text.
buttonName_select_open_invoice	string	Select Open Invoice Button Text.
dropdown_text_select_payment_method	string	Select Payment Drop Down Text.
dropdown_text_select_reason	string	Select Reason Drop Down Text.
headingname_account_column	string	Account Column Heading Text.
headingname_confirmation_column	string	Confirmation Column Heading Text.
headingName_current_balance_column	string	Current Balance Column Heading Text.
headingname_date_column	string	Date Column Heading Text.
headingName_discount_column	string	Discount Column Heading Text.
headingname_memo_ref_column	string	Memo/Reference Column Heading Text.
headingName_payment_amt_column	string	Payment Amount Column Heading Text.

Function ID/Path : /d24/getPaymentProfile

This function retrieves Payment Profile settings, from User/Global.

Variable	Type	Description
headingname_payment_option_column	string	Payment Option Column Heading Text.
headingName_remove_column	string	Remove Column Heading Text.
headingName_select_column	string	Select Column Heading Text.
headingname_status_column	string	Status Column Heading Text.
labelName_additional_explanation	string	Additional Explanation Label Text.
labelname_confirmation_number	string	Confirmation Number Label Text.
labelName_current_balance	string	Current Balance Label Text.
labelname_indicates_required_info	string	Indicates Required Information Label Text.
labelName_other_amount_field	string	Other Amount Field Label Text.
labelName_payment_method	string	Payment Method Label Text.
labelname_payment_total	string	Payment Total Label Text.
labelName_required_information	string	Required Information Label Text.
labelname_status_pending	string	Status Pending Label Text.
labelname_status_processed	string	Status Processed Label Text.
labelName_total_payment_amt	Numeric	Total Payment Amount Label Text.
remit_address1	string	Remit To Address 1.
remit_address2	string	Remit To Address 2.
remit_city	string	Remit To City.
remit_country	string	Remit To Country.
remit_name	string	Remit To Name.
remit_state	string	Remit To State.
remit_zip1	string	Remit To Zip Code 1.
remit_zip2	string	Remit To Zip Code 2.
setting_credit_allowed	string	Credit Allowed Setting.
setting_credit_greater_than_invoice	string	Credit GT Invoice Setting.
setting_credit_less_than_invoice	string	Credit LT Invoice Setting.
setting_discount_allowed	string	Discount Allowed Setting.
setting_discount_auto_applied	string	Discount Auto Applied Setting.
setting_discount_grace_days	string	Discount Grace Days Setting.
setting_future_payment_allowed	string	Future Payment Allowed Setting.
setting_partial_payment_allowed	string	Partial Payment Allowed Setting.
setting_payment_profile_description	string	Payment Profile Description.
setting_payment_profile_identifier	string	Payment Profile Code Setting.
setting_reason_code_required	string	Reason Code Required Setting.
titleName_make_a_payment	string	Make A Payment Title Text.
titleName_payment_application	string	Payment Application Title Text.
titleName_screen1_subtitle	string	Screen #1 Sub Title Text.
titleName_screen2_subtitle	string	Screen #2 Sub Title Text.
titleName_screen3_subtitle	string	Screen #3 Sub Title Text.
titlename_screen4_subtitle	string	Screen #4 Sub Title Text.

Dancik Open-WebService Reference

Function ID/Path : /d24/getPaymentProfile

This function retrieves Payment Profile settings, from User/Global.

Variable	Type	Description
titlename_transaction_details	string	Transaction Details Title Text.
titlename_transaction_history	string	Transaction History Title Text.

Layout name : payment_methods

Variable	Type	Description
acceptance_of_terms_req	string	Acceptance Of Terms Required Setting.
authorize_payment_button	string	Authorize Payment Button Text.
check_number_label	string	Check Number Label Text.
check_number_required	string	Check Number Required Setting.
check_number_visible	Numeric	Check Number Visible Setting.
convenience_fee_label	string	Convenience Fee Label Text.
convenience_fee_percentage	string	Convenience Fee Percentage Setting.
description	string	Payment Option Description.
future_payment_allowed	string	Future Payment Allowed Setting.
id	string	Payment Option Code.
memo_note_label	string	Memo/Note Label Text.
memo_note_required	string	Memo/Note Required Setting.
memo_note_visible	string	Memo/Note Visible Setting.
payment_date_label	Numeric	Payment Date Label Text.
profile_record_id	string	Profile Code Attached To.
terms_and_conditions_text	string	Terms and Conditions Text.
terms_and_conditions_title	string	Terms and Conditions Title Text.
type	string	Type Setting.

Layout name : reason_codes

Variable	Type	Description
description	string	Reason for Other Amount Description.
explanation_required	string	Reason for Other Amount Explanation Required Setting.
id	string	Reason for Other Amount Code.

Example (XML) :

```
<dancik-api-response>
  <config>
    <billto_address1> XXX </billto_address1>
    <billto_address2> XXX </billto_address2>
    <billto_city> XXX </billto_city>
    <billto_country> XXX </billto_country>
    <billto_name> XXX </billto_name>
    <billto_state> XXX </billto_state>
    <billto_zip1> XXX </billto_zip1>
    <billto_zip2> XXX </billto_zip2>
    <buttonName_cancel> XXX </buttonName_cancel>
    <buttonName_clear_selections> XXX </buttonName_clear_selections>
    <buttonName_pay_invoices> XXX </buttonName_pay_invoices>
    <buttonName_payment_details> XXX </buttonName_payment_details>
```

Example (JSON) :

```
{
  "config": { {
    "billto_address1": " XXX " ,
    "billto_address2": " XXX " ,
    "billto_city": " XXX " ,
