

Dancik Open-WebService Reference

Function ID/Path : /ssm/getSelection_Dates

This function retrieves a specific selection's dates.

Inputs :

Variable	Type	Req?	Description
ssm_id	decimal(9,0)	Y	Selection Sheet#.

Example (XML) :

```
<dancik-api-request>
  <ssm_id> XXX </ssm_id>
</dancik-api-request>
```

Example (JSON) :

```
{
  "ssm_id" : " XXX "
}
```

Outputs :

Layout name : dates

Variable	Type	Description
infoid	int	Unique identifier to the job information header.
infoname	string	Job Information name.
id	int	Unique identifier to the selected job information.
idvalue	string	Selected Job Information name.
textonly_flag	string	Y indicates the Job Information header is setup as a Text-Only field, and does not have selected values setup for it.

Example (XML) :

```
<dancik-api-response>
  <dates>
    <infoid> XXX </infoid>
    <infoname> XXX </infoname>
    <id> XXX </id>
    <idvalue> XXX </idvalue>
    <textonly_flag> XXX </textonly_flag>
  </dates>
</dancik-api-response>
```

Example (JSON) :

```
{
  "dates" : [ {
    "infoid" : " XXX ",
    "infoname" : " XXX ",
    "id" : " XXX ",
    "idvalue" : " XXX ",
    "textonly_flag" : " XXX "
  } ]
}
```
