

# Dancik Open-WebService Reference

## Function ID/Path : /d24/login

This function takes the user and password, and after proper validation, logs in the user by establishing a new session id and returns it for later use.

### Inputs :

Variable	Type	Req?	Description
d24user		Y	
d24pwd		Y	

#### Example (XML) :

```
<dancik-api-request>
  <d24user> XXX </d24user>
  <d24pwd> XXX </d24pwd>
</dancik-api-request>
```

#### Example (JSON) :

```
{
  "d24user": " XXX ",
  "d24pwd": " XXX "
}
```

### Outputs :

#### Layout name : login

Variable	Type	Description
sessionid	string	New session id assigned to the logged in user.

#### Example (XML) :

```
<dancik-api-response>
  <login>
    <sessionid> XXX </sessionid>
  </login>
</dancik-api-response>
```

#### Example (JSON) :

```
{
  "login": {
    "sessionid": " XXX "
  }
}
```
