

# Dancik Open-WebService Reference

## Function ID/Path : /ap/getElectronicInvoices

This function will get a list of Electronic Invoices.

### Inputs :

Variable	Type	Req?	Description
supplier_id	string(6)	N	Supplier Code
manifest	string(10)	N	Manifest
date_from	string(8)	N	From Date - Must be in MM/DD/YY format
date_to	string(8)	N	To Date - Must be in MM/DD/YY format
starting_record	decimal(9,0)	N	Starting Record
max_records	dec(9,0)	N	Max Records
orderBy	string(20)	N	Order By
orderByDesc	string(1)	N	Order By Descending?(Y/N)

#### Example (XML) :

```
<dancik-api-request>
  <supplier_id> XXX </supplier_id>
  <manifest> XXX </manifest>
  <date_from> XXX </date_from>
  <date_to> XXX </date_to>
  <starting_record> XXX </starting_record>
  <max_records> XXX </max_records>
  <orderBy> XXX </orderBy>
  <orderByDesc> XXX </orderByDesc>
</dancik-api-request>
```

#### Example (JSON) :

```
{
  "supplier_id" : " XXX ",
  "manifest" : " XXX ",
  "date_from" : " XXX ",
  "date_to" : " XXX ",
  "starting_record" : " XXX ",
  "max_records" : " XXX ",
  "orderBy" : " XXX ",
  "orderByDesc" : " XXX "
}
```

### Outputs :

#### Layout name : queryinfo

Variable	Type	Description
query_size	string	Query size.
next_starting_record	string	Next Starting record of the last row sent
eof	String	End of File.

#### Layout name : records

Variable	Type	Description
company	Numeric	Company Number.
voucher	Numeric	Voucher Number.
supplier_vendor	string	Supplier/Vendor Number.
invoice	string	Vendor Invoice Number.
branch	string	Branch.
workstation	string	Assigned WorkStation.
userid	string	Assigned UserID.

## Function ID/Path : /ap/getElectronicInvoices

This function will get a list of Electronic Invoices.

### Example (XML) :

```
<dancik-api-response>
  <queryinfo>
    <query_size> XXX </query_size>
    <next_starting_record> XXX </next_starting_record>
    <eof> XXX </eof>
  </queryinfo>
  <records>
    <company> XXX </company>
    <voucher> XXX </voucher>
    <supplier_vendor> XXX </supplier_vendor>
    <invoice> XXX </invoice>
    <branch> XXX </branch>
    <workstation> XXX </workstation>
    <userid> XXX </userid>
    <direct> XXX </direct>
    <manifest> XXX </manifest>
    <remarks> XXX </remarks>
  </records>
</dancik-api-response>
```

### Example (JSON) :

```
{
  "queryinfo": {
    "query_size": " XXX ",
    "next_starting_record": " XXX ",
    "eof": " XXX "
  }
  "records": {
    "company": " XXX ",
    "voucher": " XXX ",
    "supplier_vendor": " XXX ",
    "invoice": " XXX ",
    "branch": " XXX ",
    "workstation": " XXX ",
    "userid": " XXX ",
    "direct": " XXX ",
    "manifest": " XXX ",
    "remarks": " XXX "
  }
}
```

### History :

Date	Description
12/16/2015	New Call
