

# Dancik Open-WebService Reference

## Function ID/Path : /reports/getReports

This function returns a list of reports.

### Inputs :

| Variable        | Type       | Req? | Description  |
|-----------------|------------|------|--|
| start_row       | dec(9,0)   | Y    | Starting row of report list to display                                   |
| rows_per_screen | dec(9,0)   | Y    | How many rows to present on screen                                       |
| sortby          | string(20) | N    | Column to sort by  |
| sortdir         | string(4)  | N    | Sort Direction   |
| search          | string(20) | N    | Search By  |
| report_category | string(3)  | N    | Confine to Report Category   |
| report_type     | string(10) | N    | Confine to Report Type   |
| json_strings    | array      | Y    | A set of up to 9 JSON strings to find in R11XPARMS. Not for general use. |

#### Example (XML) :

```
<dancik-api-request>
  <start_row> XXX </start_row>
  <rows_per_screen> XXX </rows_per_screen>
  <sortby> XXX </sortby>
  <sortdir> XXX </sortdir>
  <search> XXX </search>
  <report_category> XXX </report_category>
  <report_type> XXX </report_type>
  <json_strings> XXX </json_strings>
</dancik-api-request>
```

#### Example (JSON) :

```
{
  "start_row": " XXX ",
  "rows_per_screen": " XXX ",
  "sortby": " XXX ",
  "sortdir": " XXX ",
  "search": " XXX ",
  "report_category": " XXX ",
  "report_type": " XXX ",
  "json_strings": " XXX "
}
```

### Outputs :

Layout name : list

| Variable           | Type | Description                         |
|--------------------|------|-------------------------------------|
| report_id          |      | Unique Report Identifier            |
| report_scheduled   |      | Report ID present if scheduled      |
| parent_report_name |      | Parent Report                       |
| report_name        |      | Long Report Name                    |
| report_user        |      | User ID                             |
| report_type        |      | Short Report Name (like RSA006)     |
| report_private     |      | Public/Private Flag                 |
| report_parms       |      | Report Parameters                   |
| report_change_date |      | Report Last Change Date (Timestamp) |
| report_change_user |      | User who last changed report        |

#### Example (XML) :

```
<dancik-api-response>
  <list>
    <report_id> XXX </report_id>
    <report_scheduled> XXX </report_scheduled>
    <parent_report_name> XXX </parent_report_name>
    <report_name> XXX </report_name>
    <report_user> XXX </report_user>
    <report_type> XXX </report_type>
    <report_private> XXX </report_private>
    <report_parms> XXX </report_parms>
  </list>
</dancik-api-response>
```

#### Example (JSON) :

```
{
  "list": {
    "report_id": " XXX ",
    "report_scheduled": " XXX ",
    "parent_report_name": " XXX ",
    "report_name": " XXX ",
    "report_user": " XXX ",
    "report_type": " XXX ",
    "report_private": " XXX ",
    "report_parms": " XXX "
  }
}
```
